KLU RESEARCH PROJECT

ISSUES OF LEADERSHIP IN HUMANITARIAN AID OPERATIONS

PROJECT DURATION
October 2016 – September 2018

PROJECT LEADER
Mojtaba Salem, PhD (Technische Universität München), Prof. Dr. Maria Besiou (Kühne Logistics University - KLU), Prof. Dr. Niels Van Quaquebeke (Kühne Logistics University - KLU)

BRIEF DESCRIPTION
Given the number of disasters such as famine, earthquakes and floods in our world, there is a need for well-executed humanitarian aid. Yet, aid organizations continue to face many problems during their operations. While the field of humanitarian aid has traditionally been looked at from an operational angle this research project, financed by the Friedrich Naumann Foundation, seeks to advance behavioral insights in the respective dynamics of the execution by leaders to better understand the organizational dynamics such as teamwork and communication in order to make humanitarian aid more effective.
