The EURO HOpE mini-conferences aims to further exchange among researchers within the field of humanitarian operations. The project is financed by the German Research Foundation (DFG) and takes place in Hamburg (2016) and Vienna (2017). Several future goals for the conference working group have been defined: improving coordination within the research area, creating a shared database to benchmark the work, achieving higher practical relevance and direct cooperation with practitioners to get to the most pressing problems and generate interesting research in theory and practice, build trust and long-term relationships with humanitarian organizations, more collaboration within the group to generate big research projects, achieve more interdisciplinary work, and create a special issue to publish the specific papers on Humanitarian Operations.
